

Cyber Affairs & Artificial Intelligence

Ranking

The continued rising importance of cybersecurity presents public sector organizations and businesses of all sizes with a raft of challenges to address and opportunities to take. From devising a cybersecurity strategy to regulatory compliance, contracts and managing risk, this field has risen to the top of priorities for businesses in the 21st century.

As one of the most forward-looking business law firms in Israel, Lipa Meir & Co. provides advice and support to domestic and international clients in the fields of cybersecurity and artificial intelligence (AI), across a broad range of transactions, addressing the needs of a range of industries, including the homeland and defense industries.

Our team advises governmental and institutional entities, public companies, banks, as well as private companies that supply a variety of products and services to these industries and businesses. Furthermore, we provide insurance companies with legal advice on cybersecurity policies for the market.

Over the years, our firm has received professional recognition as a leading firm in the field of cyber by the ranking guides.

In addition to the business and commercial legal framework, we help clients to clearly articulate and define their cybersecurity strategy, manage their internal regulatory policy on cybersecurity risks, and limit their legal exposures. Within our cradle-to-grave service, we provide legal advice regarding cybersecurity contracts, due diligence services for compliance with legislation, in Israel and abroad, and supports clients in managing cyber incidents, including any interactions with the relevant national authorities.

The lawyers in the firm hold unique expertise in governmental and regulatory affairs at the national level as well as international level, and they are experienced working with technology units. Backed by such a breadth and depth of experience, we support public-private legal engagement in the fields of cybersecurity and AI, including formulating positions and helping to shape regulation. We also provide legal advice on cybersecurity and artificial intelligence business models and R&D.

Due to the professionalism, the strategic vision, the unique experience and the variety of the services, our clients are distinctly advantaged by a special synergy between profound understanding of technology, global trends in cyberspace, and the legal sphere.
