

Insurance

Whether looking for corporate, commercial or regulatory advice or involved in commercial or class action litigation, insurance companies face a myriad of challenges. There is no substitute for a wealth of experience in meeting these challenges had on. Lipa Meir & Co.'s Insurance Department is regularly selected by clients for our long and established track record in this field, our depth of insight into the regulations affecting them and our success in countless litigation cases.

This level of experience ensures we are often the first port of call for many of the largest insurance companies, representing Clalit Health Services, the country's largest Health Maintenance Organization (HMO), and is the second largest healthcare provider in the world; Clal Insurance Company and Dikla Insurance Company; and Menora Mivtachim Insurance, one of the largest insurance companies in the Israeli market. In an extensive workload, for example, we have represented Menorah Mivtachim in relation to the decision by the Insurance Commissioner of the Ministry of Finance to invalidate collective nursing care insurance policies.

Among a range of services, we represent clients in the medical, insurance, and healthcare regulation field with regards to tender offers, transactions, regulatory issues, insurance plans and many more.

Furthermore, one of our niche areas of expertise is kibbutzim (cooperative agricultural establishments) and their industrial, agricultural and real estate operations. We regularly accompany their economic organizations, as well as advising national and regional organizations. We advise Bituach Haklai, an Israeli insurance company and a cooperative association established by the kibbutzim in Israel on a range of corporate, commercial and regulatory matters vital to their business.
